COURTROOM TECHNOLOGY MADE SIMPLE

BEINCOURT
Serving justice. Virtually.

EASYCOURT Mobile: The Ready-to-Deploy Hybrid AV Courtroom Solution for Emergencies, Continuity, and More

When disaster strikes—whether from storms, fires, or unexpected disruptions—court operations can come to a halt. EASYCOURT by BEINCOURT is a fully mobile, ready-to-deploy courtroom technology system designed to restore court services fast and keep justice moving.

What is EASYCOURT?

EASYCOURT is a portable, hybrid courtroom solution that delivers full audio, video, and virtual hearing capabilities in any location. Pre-configured and built for simple, rapid deployment, it enables courts to deploy and operate essential courtroom technology seamlessly in temporary spaces—no AV expertise required.

Key Features of EASYCOURT as a Mobile Disaster Recovery Solution:

Comprehensive Hybrid AV Capabilities:

EASYCOURT supports hybrid court proceedings, seamlessly integrating with popular conferencing platforms like Zoom and Microsoft Teams. This flexibility allows for remote participation from judges, attorneys, witnesses, and other court personnel. The system also includes essential evidence presentation tools, enabling courts to easily share and display exhibits, documents, and digital media both in-room and remotely for all participants to see clearly.

Portability and Quick Setup:

EASYCOURT is a pre-configured, mobile system that can be rapidly deployed wherever needed. Its compact design allows for easy transportation and setup, ensuring that court operations can be resumed in temporary locations with minimal downtime.

Cameras and Large Screen Displays:

EASYCOURT comes standard with two cameras and is available with large screen displays, providing clear visuals for all participants. This ensures that all evidence, documents, and testimonies can be presented and reviewed effectively, regardless of the location.

Built-in Starlink Capabilities:

EASYCOURT is available with built-in Starlink satellite internet capabilities, ensuring a reliable and high-speed internet connection even in remote or disaster-affected areas. This connectivity guarantees uninterrupted access to online resources and virtual participation, vital for maintaining court operations during emergencies.

Reliability:

EASYCOURT is engineered using industry-leading AV components from trusted manufacturers, ensuring dependable performance when courts need it most. From stable connectivity to consistent audio and video quality, every part of the system is selected for durability, uptime, and long-term reliability in real-world court environments.

Municipal Financing Options:

Understanding that budget constraints can be a significant concern, BEINCOURT offers municipal financing options for EASYCOURT. This makes it easier for courts to acquire a state-of-the-art disaster recovery solution without financial strain.

Versatility Beyond Emergencies:

While designed for disaster recovery, EASYCOURT's versatility makes it a valuable asset for a variety of scenarios. It can be used for temporary courtrooms during renovations, off-site hearings, and other situations where a traditional courtroom setup is not feasible.
